GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. After the formation of the California Water Commission back on December 19, 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

Gentlemen:

In compliance with California's Water Use Inventory Law, the district is filing the enclosed Statements of Diversion and Use of flows from 12 watershed streams.

In 1918 the district was formed for the purpose of obtaining and protecting the natural waters draining into the Coachella Valley. During the intervening years, this district has performed the management practices required to permit the maximum possible amount of stormwater runoff to infiltrate into the underground. These waters are recovered by well pumpage. There is no existing unappropriated water.

The filing of these Statements of Water Diversion and Use serves to notify you that the district has historical water rights in these and lesser streams and that there is no available water for new applicants.

If you have any questions please call Warren Norried, water resources engineer, extension 288.

Yours very truly,

Tom Levy

State Water Resources Control Board
Division of Water Rights
Post Office Box 2000
Sacramento, California 95812

Gentlemen:

In compliance with California's Water Use Inventory Law, the district is filing the enclosed Statements of Diversion and Use of flows from 12 watershed streams.

In 1918 the district was formed for the purpose of obtaining and protecting the natural waters draining into the Coachella Valley. During the intervening years, this district has performed the management practices required to permit the maximum possible amount of stormwater runoff to infiltrate into the underground. These waters are recovered by well pumpage. There is no existing unappropriated water.

The filing of these Statements of Water Diversion and Use serves to notify you that the district has historical water rights in these and lesser streams and that there is no available water for new applicants.

If you have any questions please call Warren Norried, water resources engineer, extension 288.

Yours very truly,

Tom Levy
General Manager-Chief Engineer

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

"Statements of Water Diversion and Use"
"Information Pertaining to Water Rights in California"
"Water Rights for Stockpounds Constructed Prior to 1969"
"Appropriation of Water in California"

STATEMENT OF WATER DIVERSION AND USE

This statement should be typewritten or legibly written in ink.

- A. Name of person diverting water Coachella Valley County Water District
Address P. O. Box 1058, Coachella, California 92236
- B. Name of body of water at point of diversion LONG CREEK near Desert Hot Springs
Tributary to Whitewater River.
- C. Place of diversion 1/4 1/4 Section 34, Township 25, Range 5E, SB2M,
Riverside County, or locate it on sketch of section grid on reverse side with regard to section lines or
prominent local landmarks. The stream spreads and infiltrates over portions of approximately
4 or 5 sections of natural undeveloped alluvial cones.
- D. Name of works
- E. Capacity of diversion works cubic feet per second
gallons per minute
gallons
acre-feet
Capacity of storage reservoir
State quantity of water ^{spread} ~~used~~ each month in ~~gallons~~ acre-feet
- | Year | Jan. | Feb. | Mar. | Apr. | May | June | July | Aug. | Sept. | Oct. | Nov. | Dec. | Total Annual |
|------|------|------|------|------|-----|------|------|------|-------|------|------|------|--------------|
| 1966 | : | : | 0.2 | : | : | : | : | : | : | : | : | : | 0.2 |
- If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as
acres of each crop irrigated, average number of persons served, number of stock watered, etc. Water extracted by
wells to supply 58,000 people; also irrigates approximately 10,000 farm acres.
- Maximum annual water use in recent years gallons
acre-feet
Minimum annual water use in recent years gallons
acre-feet
Type of diversion facility: gravity , pump
Method of measurement: weir , flume , electric power meter , water meter , estimate
- F. Purpose of use (what water is being used for) 23,200 Ac. Ft. for Domestic Use
69,000 Ac. Ft. for Agri. Use
- G. General description or location of place of use (use sketch of section grid on reverse side if you desire)
Coachella Valley, within District Service Area.
- H. Year of first use as nearly as known 1918
- I. Name of person filing statement Lowell O. Weeks
Position Gen. Manager-Chief Engineer Organization Coachella Valley County Water District
Address P. O. Box 1058, Coachella, California 92236
